Environment Variables

Cloudflare Preview

- Clerk Test Keys
- Supabase Dev
- Stripe Test
- OpenAI Test

Cloudflare Production

- Clerk Production Keys
 - Supabase Production
 - Stripe Live
 - OpenAI Production
-

Deployment Checklist

Before deployment

- TypeScript passes
- Build passes
- Tests complete
- Migrations reviewed

After deployment

- Login works
 - Admin works
 - Visa Bulletin loads
 - AI works
 - Stripe works
-

Backup Strategy

Supabase

- Daily backups

GitHub

- Source of truth

Google Sheets

- Historical archive
-

Rollback

If deployment fails

1. Roll back Cloudflare deployment.
2. Restore previous environment variables if changed.
3. Revert Git commit if necessary.
